

The website has been prepared or is distributed solely for information purposes and is not a solicitation or an offer to buy any security or instrument or to participate in any trading strategy. This website is not intended to be used as a general guide to investing, or as a source of any specific investment recommendations, and makes no implied or express recommendations concerning the manner in which any client's account should or would be handled, as appropriate investment strategies depend upon the client's investment objectives. The portfolio risk management process and the process of building efficient portfolios includes an effort to monitor and manage risk, but should not be confused with and does not imply low or no risk.

Traditional and Efficient Portfolio Statistics include various indices that are unmanaged and are a common measure of performance of their respective asset classes. The indices are not available for direct investment. Past performance is not indicative of future results, which may vary. The value of investments and the income derived from investments can go down as well as up. Future returns are not guaranteed, and a loss of principal may occur. Investing for short periods may make losses more likely.
