Exchange Traded Fund Report - Equity

iShares Russell 1000 Value ETF (IWD)

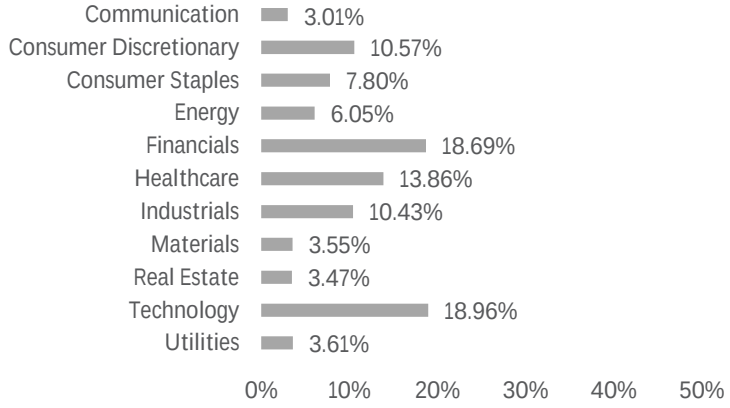

MAINSTREET ADVISORS

FUND STRATEGY DESCRIPTION

The investment seeks to track the investment results of the Russell 1000® Value Index (the "underlying index"), which measures the performance of large- and mid- capitalization value sectors of the U.S. equity market. The underlying index is a subset of the Russell 1000® Index, which measures the performance of the large- and mid-capitalization sector of the U.S. equity market, as defined by Russell. BFA uses a representative sampling indexing strategy to manage the fund. The fund may use derivatives to gain or reduce exposure to the components of the underlying index or exposure to one or more market risk factors associated with such components.

Disclosure

THIS REPORT IS FOR CLIENT USE ONLY. All information in this report is provided by Morningstar, we consider reliable, but we do not guarantee its accuracy or completeness, and it should not be relied on as such. Performance does not include advisory fees and client returns will be reduced by the advisory fees and other expenses in the management of the account.

This report has been prepared for informational purposes, and is not an offer to buy or sell or a solicitation of an offer to buy or sell any security or instrument or to participate in any particular trading strategy. It does not constitute a personal recommendation or take into account the particular investment objectives, financial situations, or needs of individual clients. Clients should, if appropriate, seek professional advice, including tax and legal advice. The appropriateness of a particular investment or strategy will depend on an investor's individual circumstances and objectives. The price and value of investments referred to in this report and the income from them may fluctuate. There are risks involved with investing, including possible loss of principal. Investing for short periods may make losses more likely. Different types of investments involve varying degrees of risk, and there can be no assurance that any specific investment will be profitable and may lose value. Fund Performance is net of fund expenses and reflects reinvestment of dividends , if any and does not take into account any transaction costs or taxes. The underlying company reserves the right to cut the dividend rate and there is no guarantee that companies will continue to issue dividends in the future.

Please carefully read fund prospectus and consider investment objectives, risks, charges, and expenses before investing as there is a possibility of loss. To obtain a current prospectus please contact MainStreet Advisors.

Morningstar Rating: Morningstar rates mutual funds from one to five stars based on how well they've performed (after adjusting for risk and accounting for all sales charges) in comparison to similar funds. Within each Morningstar Category, the top 10% of funds receive five stars, the next 22.5% four stars, the middle 35% three stars, the next 22.5% two stars, and the bottom 10% receive one star. Funds are rated for up to three time periods--three-,five-, and 10 years--and these ratings are combined to produce an overall rating. Funds with less than three years of history are not rated. Ratings are objective, based entirely on a mathematical evaluation of past performance. They're a useful tool for identifying funds worthy of further research, but shouldn't be considered buy or sell recommendations. For more information, see MainStreet Advisors' ADV Part 2 disclosure document.

Morningstar Sustainability Rating: The Morningstar Sustainability Rating is a measure of the financially material environmental, social, and governance, or ESG, risks in a portfolio relative to a portfolio's peer group. The rating is an historical holdings-based calculation using the company-level ESG Risk Rating from Sustainalytics, a leading provider of ESG research. The Sustainalytics' company-level ESG Risk Rating measures the degree to which a company's economic value may be at risk driven by ESG issues. To be considered material to the risk rating, an ESG issue must have a potentially substantial impact on the economic value of a company and therefore on the risk/return profile of an investment in the company. The ESG issues that are material vary across industry groups and companies. Within each Morningstar Category, the top 10% of funds receive five stars, the next 22.5% four stars, the middle 35% three stars, the next 22.5% two stars, and the bottom 10% receive one star.

Index performance used throughout this piece is intended to illustrate historical market trends and is provided solely as the representative of the general market performance for the same period of time. Indexes are unmanaged, may not include the reinvestment of income or short positions, and do not incur investment management fees. An investor is unable to invest in an index.
